Subject	Year 13 Core Knowledge –	How to support students' learning
	Autumn/Spring/Summer term	
Social Science - Psychology	Autumn Term         Research Methods -         1. Outline and explain the features and concept of Psychology as a science.         2. Outline, explain, and evaluate case studies as a method of triangulation in psychological research.         3. Outline and explain features of structured report writing.         4. Outline and evaluate different types of validity and reliability, in conjunction with extraneous variables and their impact on research.         Biopsychology -         5. Identify where specific functions are localised within the brain and can evaluate this theory.         6. Outline and evaluate hemispheric lateralisation, including split brain research.         7. Describe research that demonstrates brain plasticity and outline functional recovery after trauma.         8. Evaluate plasticity and functional recovery after trauma.         9. Describe and evaluate four ways of studying the brain in some detail i.e. post-mortems, EEGs, ERPs and fMRI.         10. Explain, using examples, three biological rhythms i.e. circadian, infradian and ultradian.         11. Explain the role of exogenous zeitgebers and endogenous pacemakers and analyse why each is important.	<ul> <li>All students have been given booklets for each topic they study. These booklets contain all knowledge needed to succeed in the Psychology curriculum. Students take these booklets home every lesson and you may ask your child to explain any of the core knowledge statements to you, using the booklets as reference to test them.</li> <li>The core knowledge for the Approaches in Psychology" booklet.</li> <li>The core knowledge for the Biopsychology topic will be found in the <b>pink</b> "Biopsychology Year 1" booklet.</li> <li>The core knowledge for the Psychopathology topic can be found in the <b>peach</b> "Psychopathology" booklet.</li> <li>The core knowledge for Research Methods can be found in the <b>blue</b> "Research Methods Year 1" booklet.</li> <li>The core knowledge for the Memory topic can be found in the <b>blue</b> "Research Methods Year 1" booklet.</li> <li>The core knowledge for the Memory topic can be found in the <b>cream</b> "Memory" booklet.</li> <li>If your child cannot confidently explain a core knowledge statement to you, then they should use their booklet to create revision aids for this gap in their knowledge. These could include making flash cards, mind maps and knowledge organisers.</li> <li>If students would prefer to complete past paper questions, then they can easily access some of these from their class psychology "Team." You will be able to find these past papers within the "Files" section under the folder "Past Papers."</li> </ul>
	<ol> <li>Outline and explain problems in defining crime, and methods used in offender profiling.</li> </ol>	<ul> <li>YouTube can be a fantastic resource to learn more and consolidate knowledge. The following link is to "Psych Boost" which provides many different videos all tailored to</li> </ul>

13. Outline and explain the range of	
approaches that help to explain	
offending behaviour (Biological –	
atavism, neural and genetic).	
14. Outline and explain the range of	
approaches that help to explain	
offending behaviour	
(Psychological – Personality,	
Cognitive, Social/Moral,	
Psychodynamic).	
15. Outline and explain the range of	
ways governments deal with	
offending behaviour.	
onending benavioui.	
Schizophrenia -	
16. Identify positive and negative	
symptoms of schizophrenia.	
17. Explain issues in diagnosis of	
schizophrenia, including reliability	
and validity.	
18. Describe and evaluate a range of	
explanations of schizophrenia,	
including biological and	
psychological explanations.	
19. Explain and evaluate various	
treatments in managing	
schizophrenia including; drug	
therapy, CBT, family therapy and	
token economies.	
20. Use the interactionist approach	
to explain the complex nature of	
schizophrenia development and	
treatment.	
Spring Term	
Cognition and development -	
21. Outline and evaluate Piaget's	
theory of cognitive development.	
22. Outline and evaluate Vygotsky's	
theory of cognitive development.	
23. Outline and evaluate Baillargeon's	
explanation of early infant	
abilities.	
24. Outline and evaluate Selman's	
levels of perspective in the	
context of cognitive	
development.	
25. Outline and evaluate Baron-	
Cohen's Theory of Mind as an	
explanation for autism.	

the A level Psychology course to help further your child's core knowledge. https://www.youtube.com/@PsychBoost

 The following website acts as a revision guide for AQA Psychology A-Level topics. It includes straightforward study notes and summaries of the relevant theories and studies, past papers, and mark schemes with example answers.

• Your child's teacher is always their best resource and so please encourage your child to seek extra support where appropriate. We have an open-door policy for all our students.

26. Outline and explain the role of	
mirror neurons with reference to	
social cognition.	
Issues and debates -	
27. Describe issues with gender and	
culture bias in psychological	
research.	
28. Describe the debate of free will	
vs determinism and explain three	
types of determinism (biological,	
environmental and psychic).	
29. Explain the nature-nurture	
debate, with examples, including	
the complexity of nature-nurture (epigenetics).	
30. Describe the debate of	
reductionism vs holism and be	
able to provide explained	
strengths and weaknesses of	
each approach.	
31. Describe both idiographic and	
nomothetic approaches to	
conducting research and the	
strengths and weaknesses of	
using each approach.	
32. Describe ethical implications and	
be able to explain and give	
reasons as to why research is	
socially sensitive.	
Summer Term	
Overall -	
33. Can apply understanding to a	
range of questions relating to	
approaches.	
34. Can apply understanding to a	
range of questions relating to	
biopsychology.	
35. Can apply understanding to a	
range of questions relating to	
Research methods.	
36. Can apply understanding to a	
range of questions relating to	
attachment.	
37. Can apply understanding to a	
range of questions relating to	
social influence.	
38. Can apply understanding to a	
range of questions relating to	
memory.
